

Firmware Download Instructions

1

Please visit: <https://info.travlfifi.com/xtr-firmware>

2

Download the attached upgrade pack and share the file directly or via We Transfer Download on Windows OS / Mac computer.

3

Log in to the CPE Admin Portal via a web browser while connected and input to web address bar: 192.168.0.1 → Management → Upgrade → Local Upgrade → Select File → Upload.

4

The router will reboot, wait 2-3 minutes, when the lights on the router stop changing and blinking.

5

If Wi-Fi SSID or internet connection does not resume, reset the router by pressing the pin hole besides the power input for 5 seconds.

6

Connect the router through Wi-Fi SSID or Ethernet, log in the admin portal to verify the software version, if it is upgrade to v1.1.5.

7

Test the internet connection.
